

Orckit-Corrigent Receives Network Products Guide 2009 Product Innovation Award

CM-4140 Selected A Winner In Carrier Ethernet Switch Category

Tel Aviv, Israel – May 18, 2009 – Orckit-Corrigent announced today that Network Products Guide, industry's leading publication on information technologies and solutions has named the CM-4140 product, a winner of the 2009 Product Innovation Award. This annually venerated award recognizes and honors vendors from all over the world with innovative and ground-breaking products that are bringing essential and incremental changes and are setting the bar higher for others in all areas of information technology.

CM4140 is a Layer 2 MPLS Carrier Ethernet +Transport (CE+T) switch highly optimized for 1st layer aggregation mainly due to its cost efficiency, high port density, small form factor and low power consumption. In addition, the CM-4140 supports wide set of transport features, including the ability to deliver both Ethernet, PDH (E1/T1) and SDH (STM-1/4/16) services over packet-based networks, and enables gradual migration of the existing SONET/SDH networking infrastructure to a next generation Carrier Ethernet networks.

CM-4140 is the first product to introduce standard and interoperable Layer 2 MPLS at the metro edge network domain, and the first to introduce high switching capacity of 168Gbps at small 3RU footprint with minimized power consumption. Thus, CM-4140 is breaking the MPLS cost-performance paradigm. To read more about this product innovation, please visit www.networkproductsguide.com/innovations

"Innovation is clearly an important factor for greater success and has the most impact on staying competitive," says Rake Narang, editor-in-chief of Network Products Guide. "Innovative products such as CM-4140 are bringing improvements in telecommunication service providers' abilities to extend Layer 2 MPLS technology to the access edge and smoothly migrate legacy TDM services, in a cost-optimized Carrier Ethernet network."

"We are proud to receive Network Products Guide's product innovation award and recognition in our CM-4140 switch. This further validates our CM-4000 Carrier Ethernet + Transport (CE+T) products as excellence-in-class and ahead of the curve," says Sharon Mantin, VP marketing at Orckit-Corrigent. "Product innovation is a key to our continued commitment to meeting our customer needs and providing them with solutions that are ground-breaking."

About Network Products Guide Awards

Network Products Guide is a media sponsor of Interop and Technosium Executive Alliance Forums engaging Chief Information Officers (CIOs) and Chief Information Security Officers (CISOs). As industry's leading technology research and advisory publication, it plays a vital role in keeping decision makers and end-users informed of the choices they can make in all areas of information technology. You will discover a wealth of information and tools in this guide including the best products and services, roadmaps, industry directions, technology advancements and independent product evaluations that facilitate in making the most pertinent technology decisions impacting business and personal goals. The guide follows conscientious research methodologies developed and enhanced by industry experts. To learn more, visit www.networkproductsguide.com

About Orckit-Corrigent

Orckit-Corrigent facilitates telecommunication providers' delivery of high capacity broadband residential, business and mobile services over wireline or wireless networks. With 20 years of field experience, a reputable list of worldwide Tier-1 customers and sound leadership, the company has a firm foothold in the ever-developing world of telecommunication.

The company's product lines include Carrier Ethernet + Transport (CE+T) switches - An MPLS based portfolio enabling advanced packet as well as legacy services over packet networks with a wide set of transport features, and Personalized Video Distribution systems - An advanced video distribution portfolio, optimized for IPTV, enabling multiple HD streams per home over the existing DSL infrastructure.

Orckit-Corrigent markets its products directly and indirectly through strategic alliances as well as distribution and reseller partners worldwide.

The company was founded in 1990 and went public 1996. The company is dually traded in NASDAQ (ORCT) and Tel Aviv stock exchange and is headquartered in Tel-Aviv, Israel.
